### **DETAILED ACTION**

Claims 1-17 are pending.

Applicant is requested to correct the attachment the Formula in claim 1 (a).

#### ***Election/Restrictions***

Claim 1 generic to the following disclosed patentably distinct species: Administration of at least one diphenyl compound, and anthracyclic chemotherapeutic agent and a texane chemotherapeutic agent. The diphenyl compounds as presented in (a) cover large number of compounds.

The species are independent or distinct because these species are not obvious variants of each other based on the current record. There is an examination and search burden for these patentably distinct species due to their mutually exclusive characteristics. The Species require a different field of search (e.g., searching different classes/subclasses or electronic resources, or employing different search queries); and/or the prior art applicable to one species would not likely be applicable to another species; and/or the species are likely to raise different non-prior art issues under 35 U.S.C. 101 and/or 35 U.S.C. 112, first paragraph.

A telephone call was made to Mr. Robert B. Murray on 9/11/07 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with

Art Unit: 1616

this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).
